

**Course: Removable prosthodontics**

**Course Coordinator: Daniela Kovačević Pavičić, DMD, PhD, Full Professor**

**Department: Department of Prosthodontics**

**Study program: University Integrated Undergraduate and Graduate Study of Dental Medicine**  
(in English)

**Study year: 4.**

**Academic year: 2023./24.**

## **SYLLABUS**

**Course description (a brief description of the course, general instructions, where and in what form the lessons are organized, necessary equipment, instructions for attendance and preparation for classes, student obligations, etc.):**

Course: Removable Prosthodontics

Removable Prosthodontics is a mandatory course in the fourth, fifth, and sixth year of the Integrated Undergraduate and Graduate University Study of Dental Medicine, consisting of 30 hours of lectures, 165 hours of practical exercises, and 60 hours of seminars, totaling 255 hours (17.0 ECTS). The course is conducted at the Clinic for Dental Medicine at the Clinical Hospital Center Rijeka and the Dental Medicine Study of the Faculty of Medicine at the University of Rijeka.

In the fourth year of the study, the curriculum includes 30 lectures, 60 practical exercises, and 30 seminars.

The objective of the course is to equip students with the skills for diagnosing and treating complete and partial edentulism and all its consequences through the fabrication of complete or partial removable dental prostheses in preclinical and clinical conditions. The course also aims to provide knowledge about complex treatments involving combined fixed and removable denture and functional-aesthetic rehabilitation of the stomatognathic system in collaboration with specialists from other dental disciplines. The course tasks include learning anatomical-functional relationships, neuromuscular mechanisms, and biomechanics of the stomatognathic system and their disorders in cases of partial or complete edentulism, including the basics of mobile prosthodontics with dental implants.

The content of the course includes the following:

Familiarization with the biological basis and anatomy and function of the stomatognathic system, applying previously acquired knowledge from fundamental biomedical disciplines.

Provision of theoretical foundations and practical knowledge about technical, technological, and clinical procedures in the fabrication of partial and complete dental prostheses, including work with articulators.

Understanding the etiology, pathology, pathophysiology, and diagnostics of disorders and degenerative changes in the stomatognathic system resulting from partial or complete tooth loss. Clinical and instrumental analysis and adjustment of occlusion, pre-therapeutic procedures, and preprosthetic patient preparation, including splints, dental implants, and procedures for making combined fixed and removable dental prostheses.

Procedures for making temporary, immediate, and provisional prostheses.

Familiarization with changes in soft and hard oral tissues in prosthesis wearers.

Repairs of prosthesis fractures and relining procedures.

Fundamentals of oral rehabilitation and interdisciplinary collaboration in the diagnosis and treatment of partial and complete edentulism and its consequences.

Teaching methods:

The course is conducted through lectures, seminars, and practical exercises. The total duration of the course is five semesters. During practical exercises, the instructor demonstrates and supervises active student participation. Seminars involve discussions with students about the specifics of prosthetic rehabilitation. Two mandatory quizzes will be held during the course, and one seminar paper will be assessed. Continuous evaluation of theoretical and practical knowledge will occur during clinical exercises. The course concludes with a final exam consisting of a practical, written, and oral part. By completing all course activities and taking the final exam, students will earn 17 ECTS credits.

**Assigned reading:**

Filed J, Storey C. Removable Prosthodontics at a glance. Wiley-Blackwell. 2020.

**Optional/additional reading:**

Carr AB, McGivney GP, Brown DT. McCracken's Removable Partial Prosthodontics 11th ed., Elsevier Mosby, 2006.

**COURSE TEACHING PLAN:**

**The list of lectures (with topics and descriptions):**

**P1. Introduction to the course and historical overview**

Learning outcomes:

Familiarize with the objectives of the Mobile Prosthodontics course.

Acquire knowledge about the historical facts of the development of prosthetic rehabilitation using removable prosthetic replacements.

**P2. Importance of communication with the patient**

Learning outcomes:

Define the importance of communication with patients requiring mobile prosthetic treatments.

Explain the approach to patients with special needs and various systemic diseases.

### **P3. Types of complete and partial dentures**

Learning outcomes:

Describe the types of complete and partial dentures.

Explain the fabrication methods of dentures considering the process of fabrication.

Explain the fabrication methods of dentures considering the material used.

### **P4. Causes and consequences of complete and partial tooth loss**

Learning outcomes:

Define the causes of tooth loss.

Explain the consequences of complete tooth loss.

Explain the consequences of partial tooth loss.

### **P5. Patient medical history and clinical examination**

Learning outcomes:

Explain the importance of medical history.

Explain the specifics of dental history.

Describe the clinical examination of the patient.

### **P6. Preprosthodontic patient preparation**

Learning outcomes:

Define the possibilities of preprosthodontic patient preparation.

Explain the collaboration of dental prosthodontics specialists with various medical specialties.

Explain the collaboration of dental prosthodontics specialists with various dental specialties.

### **P7. Impression techniques in removable dental prosthodontics**

Learning outcomes:

Explain the purpose of taking impressions in removable prosthodontics.

Define the types of impression techniques.

Define the procedures and materials for taking impressions.

### **P8. Vertical interocclusal relationships**

Learning outcomes:

Explain the reference positions of the mandible.

Define the procedures for making trial bases.

Define the procedures for determining the vertical dimension of occlusion.

### **P9. Horizontal interocclusal relationships**

Learning outcomes:

Define the procedures for determining the horizontal dimension of occlusion.

Define the possibilities for fixing trial bases.

### **P10. Retention factors**

Learning outcomes:

Define the retention factors of complete dentures.

Explain the retentive force in altered anatomical conditions.

**P11. Retention factors**

Learning outcomes:

Define the retention factors of partial dentures.

Explain the advantages and disadvantages of different retentive elements.

**P12. Transfer of models to an articulator**

Learning outcomes:

Define the types and role of anatomical and kinematic face bow.

Explain the mounting of the anatomical face bow.

**P13. Transfer of models to an articulator**

Learning outcomes:

Define the types and classification of articulators.

Explain the role of articulators in removable prosthodontic rehabilitation.

**P14. Selection of artificial teeth**

Learning outcomes:

Define the rules for selecting front and posterior teeth in complete edentulism.

Define the rules for selecting front and posterior teeth in partial edentulism.

**P15. Individualization of tooth setup**

Learning outcomes:

Describe various theories about the aesthetics of complete and partial dentures.

Explain the impact of aging on tooth and viscerocranium changes.

**P16. Selection of occlusion and occlusal concepts**

Learning outcomes:

Define occlusal concepts and types of occlusion in complete and partial edentulism.

Explain the indications and contraindications of specific occlusal concepts and types of occlusion.

**P17. Statics of removable prosthodontic replacements**

Learning outcomes:

Explain the method of transmitting chewing forces to supporting tissues.

Define static principles.

Explain the indications for deviating from static principles and compensatory possibilities.

**P18. Delivery of removable and combined prosthodontic replacements**

Learning outcomes:

Define the final appearance of removable prosthodontic and combined prosthodontic replacements.

Explain the procedures for delivering mobile and combined prosthetic replacements.

**P19. Most common post-insertion problems**

Learning outcomes:

Define the most common post-insertion problems.

Explain the causes of post-insertion problems.

Explain the possibilities of adjusting prosthodontic replacements and oral tissues.

**P20. Overdentures**

Learning outcomes:

Define the types of overdentures.

Explain the indications and contraindications for making overdentures.

Explain the procedures for making overdentures.

**P21. Immediate dentures**

Learning outcomes:

Explain the indications and contraindications for making immediate dentures.

Define the procedures for making immediate dentures.

**P22. Relining, rebasing, repairs**

Learning outcomes:

Explain the indications and contraindications for relining and rebasing dentures.

Explain the materials and procedures for relining, rebasing, and repairing dentures.

**P23. TMJ in edentulous patients**

Learning outcomes:

Explain the symptoms of temporomandibular disorders in edentulous patients.

Explain the possibilities of therapeutic procedures.

**P24. Speech impairment as a result of inadequate removable prosthodontic replacements**

Learning outcomes:

Explain the causes of speech impairment in wearers of removable prosthodontic replacements.

Explain the possibilities of adapting speech to new removable prosthodontic replacements.

**P25. Resection dentures, obturators, epistheses**

Learning outcomes:

Explain the indications for fabrication.

Explain the procedures for fabrication.

**P26. Resection dentures, obturators, epistheses**

Learning outcomes:

Explain the complications of making resection prostheses, obturators, and epistheses.

**P27. Implant-supported complete dentures**

Learning outcomes:

Describe the indications and contraindications for implant therapy in complete edentulism.

Explain the procedures for making complete dentures retained by implants.

**P28. Implant-supported complete dentures**

Learning outcomes:

Describe the complications of implant-prosthetic rehabilitation in complete edentulism.

Explain the procedures for maintaining implant-supported mobile prostheses.

**P29. Digital procedures in fabrication of removable prosthodontic replacements**

Learning outcomes:

Explain the role of digital procedures in fabricating removable prosthodontic replacements.  
Describe the procedures for making "digital" dentures.

**P30. Digital procedures in fabrication of removable prosthodontic replacements**

Learning outcomes:

Explain the role of digital procedures in fabricating removable prosthodontic replacements.  
Describe the procedures for making "digital" dentures.

**The list of seminars with descriptions:**

**S1. Base bearing area of upper and lower complete dentures**

Learning outcomes:

Define the hard tissues of the base bearing area in the upper and lower jaw.  
Define the soft tissues of the base bearing area in the upper and lower jaw.  
Describe the boundaries of complete dentures.

**S2. Impression techniques in removable prosthodontics.**

Learning outcomes:

Explain the types of impression techniques.  
Describe the trays used for taking impressions.

**S3. Materials for impression procedures in removable prosthodontics.**

Learning outcomes:

Define impression materials.  
Explain the advantages and disadvantages of specific materials.

**S4. Working models in removable prosthodontics**

Learning outcomes:

Describe the working models in removable prosthodontics.  
Describe the procedure and materials for working models.

**S5. Individual tray**

Learning outcomes:

Define the appearance and edges of the individual tray.  
Describe the procedure for making an individual tray.

**S6. Retention of complete dentures**

Learning outcomes:

Describe the suction effect of complete dentures.  
Explain other retention possibilities for complete dentures.

**S7. Stabilization of complete dentures**

Learning outcomes:

Explain the stabilization factors of complete dentures.  
Explain the causes and consequences of poorly stabilized complete dentures.

### **S8. Mandibular reference positions**

Learning outcomes:

Define the reference positions of the mandible.

Explain the importance of correctly determining reference positions.

### **S9. Determination of vertical dimension in complete edentulism**

Learning outcomes:

Define the determination of vertical dimension in complete edentulism.

Explain the methods of determining vertical dimension.

### **S10. Determination of horizontal dimension in complete edentulism**

Learning outcomes:

Define the determination of horizontal dimension in complete edentulism.

Explain the methods of determining horizontal dimension.

### **S11. Trial bases**

Learning outcomes:

Describe the trial bases.

Explain the clinical procedures for adapting and fixing trial bases.

### **S12. Selection and arrangement of anterior teeth in complete edentulism**

Learning outcomes:

Define the rules for selecting anterior teeth.

Define the rules for the arrangement of anterior teeth.

### **S13. Selection and arrangement of posterior teeth in complete edentulism**

Learning outcomes:

Define the rules for selecting posterior teeth.

Define the rules for the arrangement of posterior teeth.

### **S14. Facial bow**

Learning outcomes:

Describe the types of facial bow.

Explain the mounting of the anatomical facial bow.

### **S15. Articulators**

Learning outcomes:

Describe the types of articulators.

Explain the fixation of working models in articulators.

### **S16. Denture relining**

Learning outcomes:

Describe the indications for denture relining.

Explain the procedures and materials for denture relining.

### **S17. Denture repairs**

Learning outcomes:

Explain the causes of denture fractures.

Describe the denture repair procedure.

**S18. Post-insertion problems of complete dentures**

Learning outcomes:

Explain the post-insertion problems of complete dentures.

Describe the solutions to post-insertion problems.

**S19. Causes and consequences of partial edentulism**

Learning outcomes:

Define the causes of tooth loss.

Explain the consequences of partial edentulism on the stomatognathic system.

**S20. Classification of partial edentulism**

Learning outcomes:

Define the topographic and functional classification of partial edentulism.

Explain the importance of the classification of partial edentulism.

**S21. Planning of the base for a partial denture**

Learning outcomes:

Define the shapes of bases for partial dentures.

Explain the indications for each shape of the partial denture base.

**S22. Planning of retention elements for a partial denture**

Learning outcomes:

Define the retention elements of a partial denture.

Explain the indications and contraindications for each retention element.

**S23. Planning of stabilizing elements for a partial denture**

Learning outcomes:

Define the stabilizing elements of a partial denture.

Explain the indications and contraindications for each stabilizing element.

**S24. Clasps**

Learning outcomes:

Describe the types of clasps based on material and design.

Describe the advantages and disadvantages of different types of clasps.

**S25. Attachments**

Learning outcomes:

Describe the types of attachments based on topographic and functional classification.

Describe the advantages and disadvantages of different types of attachments.

**S26. Bars and connectors**

Learning outcomes:

Describe the various types of bars and connectors.

Define the indications and contraindications for each type of bar and connector.

**S27. Telescopic crowns**

Learning outcomes:

Describe telescopic crowns.

Explain the advantages and disadvantages of telescopic crowns compared to other retention elements.

**S28. Conus crowns**

Learning outcomes:

Describe conus crowns.

Define the advantages and disadvantages of conus crowns compared to other retention elements.

**S29. Laboratory stages in the fabrication of complete dentures**

Learning outcomes:

Describe the laboratory stages in the fabrication of complete dentures.

Define the materials, instruments, and equipment for the laboratory fabrication of complete dentures.

**S30. Laboratory stages in the fabrication of partial dentures**

Learning outcomes:

Describe the laboratory stages in the fabrication of partial dentures.

Define the materials, instruments, and equipment for the laboratory fabrication of partial dentures.

**The list of practicals with descriptions:**

The practicals of the course Removable Prosthodontics are conducted at the Clinic for Dental Medicine of the Clinical Hospital Center Rijeka. Before participating in the practicals, students are required to acquire the theoretical knowledge that they will apply practically on models and patients. During the practicals, students will gain the knowledge and skills necessary for planning and fabricating removable and combined fixed-removable prosthodontic replacements.

**Students' obligations:**

Students must regularly attend and actively participate in all forms of teaching.

**Assessment (exams, description of written / oral / practical exam, the scoring criteria):**

ECTS credit rating system:

Student grading is conducted according to the current University of Rijeka Studies and studying regulation. The students' work will be evaluated and evaluated during the course and in the final exam. Out of a total of 100 points, a student can get 70 points during classes, and 30 points in the final exam. Students are graded using the ECTS (A-F) and numerical system (1-5). Grading in the ECTS system is carried out by absolute distribution.

Of the maximum 70 grade points that can be obtained during classes, the student must collect a minimum of 40 grade points in order to take the final exam. Students who collect less than 40 evaluation points will have the opportunity to take one remedial mid-term exam and, if they pass the mid-term exam, they will be able to take the final exam. Students who collect 39.9 or less grade points (F grade category) must re-enroll in the course.

To the final exam, the student is obliged to bring a completed control sheet from the clinical exercises.

The student acquires grade points by actively participating in classes and completing assigned tasks in the following way:

I. During the class, the following are evaluated (maximum 70 points):

Table 1: Evaluation of obligations of Dental Medicine students for the Mobile Prosthetics course

**VALUATION Max. number of evaluation points**

**Colloquiums**

**I. colloquium - at the end of the VIII semester, 20**

**II. colloquium – at the end of X semester 20**

**40 in total**

**Exercises Continuous verification of theoretical and practical knowledge. The average grade is taken in the following way:**

**grade 2=5 points**

**grade 3=10 points**

**grade 4=15 points**

**grade 5=20 points 20**

**Seminar work**

**Written form (PP presentation) and oral presentation (during X semester) 10**

**TOTAL 70**

**Evaluation of the colloquium with 20 evaluation points**

**Colloquium 40 questions = 20 points**

A student must have **50%** correct answers to pass. Each further answer is multiplied by a coefficient of 0.5 and the number of points on the colloquium is obtained (20/40). If the student does not pass the colloquium on the 1st deadline, another deadline will be organized for him.

Final exam (30 marks in total)

Who can take the final exam:

Students who successfully passed I. and II. colloquium and which were positively evaluated on student exercises. Students who have obtained more than 40 points during the course must take the final exam, where they can obtain a maximum of 30 points.

Who cannot take the final exam:

Students who did not successfully pass I. and II. colloquium and which were not positively evaluated on student exercises. Students who obtained less than 40 points during the course do not have the right to sit for the final exam.

The final exam is practical, written and oral. It carries 30 evaluation points.

Evaluation of the final exam with 30 marks

5 points - practical part of the exam

5 points - written part of the exam

20 points - oral part of the exam

For a positive evaluation of the final exam, all three parts must be successfully passed. In order for a student to be evaluated with a final grade, he must successfully pass the final exam. If he does not pass the final exam, he will receive a negative grade overall. The student has the right to take the next exam period.

**Formation of the final grade:**

**The grades achieved during the VII, VIII, IX, X and XI semesters are joined by the points achieved in the final exam. Based on the total sum of points, students are evaluated as follows:**

**A (5) – 90-100 grade points**

**B (4) – 75-89.99 grade points**

**C (3) – 60-74.99 grade points**

**D (2) – 50-59.99 grade points**

**F (1) – 0-49.99 grade points**

The numerical evaluation system is compared with the ECTS system as follows: A - excellent (5), B - very good (4), C - good (3), D - sufficient (2), F - insufficient (1).

**Other important information regarding to the course:**

## COURSE SCHEDULE (for the academic year 2023/2024)

Date	Lectures (time and place)	Seminars (time and place)	Practicals (time and place)	Instructor
03.10.2023.			16.00-17.30 V1 Grup D	Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent. Prof.dr.sc. Vlatka Debeljak, dr.med.dent.
04.10.2023	13.00-13.45 P1			Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent.
06.10.2023.		12.00-12.45 S1		Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent.
10.10.2023.			16.00-17.30 V2 Grup D	Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent. Prof.dr.sc. Vlatka Debeljak, dr.med.dent.
11.10.2023.	13.00-13.45 P2			Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent.
13.10.2023.		12.00-12.45 S2		Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent.
17.10.2023.			16.00-17.30 V3 Grup D	Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent. Prof.dr.sc. Vlatka Debeljak, dr.med.dent.
18.10.2023.	13.00-13.45 P3			Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent.
20.10.2023.		12.00-12.45 S3		Prof.prim.dr.sc. Daniela Kovačević Pavičić, dr.med.dent.

**List of lectures, seminars and practicals:**

	<b>LECTURES (Topics)</b>	<b>Teaching hours</b>	<b>Location/Lecture room</b>
P1	Retention factors	1	Krešimirova 40
P2	Transfer of models to an articulator	1	Krešimirova 40
P3	Transfer of models to an articulator	1	Krešimirova 40
P4	Selection of artificial teeth	1	Krešimirova 40
P5	Individualization of tooth setup	1	Krešimirova 40
P6	Selection of occlusion and occlusal concepts	1	Online
P7	Statics of removable prosthodontic replacements	1	Online
P8	Delivery of removable and combined prosthodontic replacements	1	Online
P9	Most common post-insertion problems	1	Online
P10	Overdentures	1	Online
P11	Immediate dentures	1	Online
P12	Relining, rebasing, repairs	1	Online
P13	TMJ in edentulous patients	1	Online
P14	Speech impairment as a result of inadequate removable prosthodontic replacements	1	Online
P15	Resection dentures, obturators, epistheses	1	Online
P16	Resection dentures, obturators, epistheses	1	Online
P17	Implant-supported complete dentures	1	Online
P18	Implant-supported complete dentures	1	Online
P19	Digital procedures in fabrication of removable prosthodontic replacements	1	Online
P20	Digital procedures in fabrication of removable prosthodontic replacements	1	Online
P21	Retention factors	1	Online
P22	Transfer of models to an articulator	1	Online
P23	Transfer of models to an articulator	1	Online
P24	Selection of artificial teeth	1	Online
P25	Individualization of tooth setup	1	Online
P26	Selection of occlusion and occlusal concepts	1	Online
P27	Statics of removable prosthodontic replacements	1	Online
P28	Delivery of removable and combined prosthodontic replacements	1	Online
P29	Most common post-insertion problems	1	Online
P30	Overdentures	1	Online
	<b>TOTAL TEACHING HOURS</b>	<b>30</b>	

	<b>SEMINARS (Topics)</b>	<b>Teaching hours</b>	<b>Location/Lecture room</b>
S1	Base bearing area of upper and lower complete dentures	1	Krešimirova 40
S2	Impression techniques in removable prosthodontics.	1	Krešimirova 40
S3	Materials for impression procedures in removable prosthodontics.	1	Krešimirova 40
S4	Working models in removable prosthodontics	1	Krešimirova 40
S5	Individual tray	1	Krešimirova 40
S6	Retention of complete dentures	1	Online
S7	Stabilization of complete dentures	1	Online
S8	Mandibular reference positions	1	Online
S9	Determination of vertical dimension in complete edentulism	1	Online
S10	Determination of horizontal dimension in complete edentulism	1	Online
S11	Trial bases	1	Online
S12	Selection and arrangement of anterior teeth in complete edentulism	1	Online
S13	Selection and arrangement of posterior teeth in complete edentulism	1	Online
S14	Facial bow	1	Online
S15	Articulators	1	Online
S16	Denture relining	1	Online
S17	Denture repairs	1	Online
S18	Post-insertion problems of complete dentures	1	Online
S19	Causes and consequences of partial edentulism	1	Online
S20	Classification of partial edentulism	1	Online
S21	Planning of the base for a partial denture	1	Online
S22	Planning of retention elements for a partial denture	1	Online
S23	Planning of stabilizing elements for a partial denture	1	Online
S24	Clasps	1	Online
S25	Attachments	1	Online
S26	Bars and connectors	1	Online
S27	Telescopic crowns	1	Online
S28	Conus crowns	1	Online
S29	Laboratory stages in the fabrication of complete dentures	1	Online
