

Course: Removable prosthodontics

Course Coordinator: Daniela Kovačević Pavičić, DMD, PhD, Full Professor

Department: Department of Prosthodontics

Study program: University Integrated Undergraduate and Graduate Study of Dental Medicine
(in English)

Study year: 5.

Academic year: 2024./25.

SYLLABUS

Course description (a brief description of the course, general instructions, where and in what form the lessons are organized, necessary equipment, instructions for attendance and preparation for classes, student obligations, etc.):

Course: Removable Prosthodontics

Removable Prosthodontics is a mandatory course in the fourth, fifth, and sixth year of the Integrated Undergraduate and Graduate University Study of Dental Medicine, consisting of 30 hours of lectures, 165 hours of practical exercises, and 60 hours of seminars, totaling 255 hours (17.0 ECTS). The course is conducted at the Clinic for Dental Medicine at the Clinical Hospital Center Rijeka and the Dental Medicine Study of the Faculty of Medicine at the University of Rijeka.

In the fourth year of the study, the curriculum includes 30 lectures, 60 practical exercises, and 30 seminars.

The objective of the course is to equip students with the skills for diagnosing and treating complete and partial edentulism and all its consequences through the fabrication of complete or partial removable dental prostheses in preclinical and clinical conditions. The course also aims to provide knowledge about complex treatments involving combined fixed and removable denture and functional-aesthetic rehabilitation of the stomatognathic system in collaboration with specialists from other dental disciplines. The course tasks include learning anatomical-functional relationships, neuromuscular mechanisms, and biomechanics of the stomatognathic system and their disorders in cases of partial or complete edentulism, including the basics of mobile prosthodontics with dental implants.

The content of the course includes the following:

Familiarization with the biological basis and anatomy and function of the stomatognathic system, applying previously acquired knowledge from fundamental biomedical disciplines.

Provision of theoretical foundations and practical knowledge about technical, technological, and clinical procedures in the fabrication of partial and complete dental prostheses, including work with articulators.

Understanding the etiology, pathology, pathophysiology, and diagnostics of disorders and degenerative changes in the stomatognathic system resulting from partial or complete tooth loss.

Clinical and instrumental analysis and adjustment of occlusion, pre-therapeutic procedures, and preprosthetic patient preparation, including splints, dental implants, and procedures for making combined fixed and removable dental prostheses.

Procedures for making temporary, immediate, and provisional prostheses.

Familiarization with changes in soft and hard oral tissues in prosthesis wearers.

Repairs of prosthesis fractures and relining procedures.

Fundamentals of oral rehabilitation and interdisciplinary collaboration in the diagnosis and treatment of partial and complete edentulism and its consequences.

Teaching methods:

The course is conducted through lectures, seminars, and practical exercises. The total duration of the course is five semesters. During practical exercises, the instructor demonstrates and supervises active student participation. Seminars involve discussions with students about the specifics of prosthetic rehabilitation. Two mandatory quizzes will be held during the course, and one seminar paper will be assessed. Continuous evaluation of theoretical and practical knowledge will occur during clinical exercises. The course concludes with a final exam consisting of a practical, written, and oral part. By completing all course activities and taking the final exam, students will earn 17 ECTS credits.

Assigned reading:

Filed J, Storey C. Removable Prosthodontics at a glance. Wiley-Blackwell. 2020.

Optional/additional reading:

Carr AB, McGivney GP, Brown DT. McCracken's Removable Partial Prosthodontics 11th ed., Elsevier Mosby, 2006.

The list of seminars with descriptions:

S1. Overdentures

Learning Outcomes:

- Define overdentures.
- Explain the advantages and disadvantages of overdentures.

S2. Implants overdentures

Learning Outcomes:

- Explain the advantages and disadvantages of implants overdentures.
- Describe the fabrication process.

S3. Immediate Denture

Learning Outcomes:

- Define an immediate denture.
- List the advantages and disadvantages of an immediate denture.
- Describe the fabrication process.

S4. Temporary Denture

Learning Outcomes:

- Define a temporary denture.

- Explain the conversion of a temporary denture into a definitive one.

S5. Combined fixed-mobile replacement

Learning Outcomes:

- Define combined prosthodontic work.
- Describe the fabrication process of combined prosthodontic work.
- Explain the advantages of combined prosthodontic work compared to conventional dentures.

S6. Cementation of Combined fixed-mobile replacement

Learning Outcomes:

- Describe the cementation process of combined prosthodontic work.
- Describe potential complications during cementation.

S7. Materials in Removable Prosthodontics

Learning Outcomes:

- Describe materials used in removable prosthodontics.
- Describe the handling and storage of impression materials.

S8. Complications During Removable Prosthodontic Rehabilitation

Learning Outcomes:

- Describe complications that may arise during removable prosthodontic rehabilitation.
- Explain possible solutions for resolving removable prosthodontic complications.

S9. Dissatisfied Patient

Learning Outcomes:

- Describe communication strategies with a dissatisfied patient.

S10. Abrasion and Prosthodontic Rehabilitation

Learning Outcomes:

- Define the causes and consequences of abrasion.
- Describe prosthodontic rehabilitation options for patients with abrasion.

S11. Temporomandibular Dysfunction and Removable Prosthodontic Patients

Learning Outcomes:

- Define temporomandibular dysfunctions.
- Describe prosthodontic rehabilitation for patients with temporomandibular dysfunction.

S12. Basics of Implantology and Osseointegration in Removable Prosthodontics

Learning Outcomes:

- Define osseointegration.
- Describe removable prosthodontic work on implants.

S13. Pediatric Prosthodontics

Learning Outcomes:

- Define indications for prosthodontic therapy in children.
- Describe the fabrication of prosthodontic work in children.

S14. Geriatric Prosthodontics

Learning Outcomes:

- Describe the specific aspects of working in removable prosthodontics for elderly patients.
- Define potential complications in elderly patients.

S15. Speech and Removable Prosthodontic Replacements

Learning Outcomes:

- Describe the impact of speech on communication.
- Explain the impact of prosthodontic replacements on communication.
- Define errors in prosthodontic replacements that affect speech.

S16. BPS Dentures

Learning Outcomes:

- Explain BPS dentures.
- Describe the advantages and disadvantages compared to conventional dentures.
- Explain the fabrication process.

S17. Hybrid Dentures

Learning Outcomes:

- Explain hybrid dentures.
- Describe the advantages and disadvantages compared to conventional dentures.
- Explain the fabrication process.

S18. High-Risk Prosthodontic Patients

Learning Outcomes:

- Define high-risk patients.
- Explain the "preparation" of high-risk patients for prosthodontic rehabilitation.

S19. Preprosthetic Patient Preparation

Learning Outcomes:

- Explain preprosthetic patient preparation.
- Explain the advantages of preprosthetic patient preparation.

S20. Consequences of Wearing Inappropriate Removable Prosthodontic Replacements

Learning Outcomes:

- Describe the consequences of wearing inappropriate prosthodontic replacements.
- Explain the resolution of issues caused by wearing inappropriate prosthodontic replacements.

S21. Collaboration Between Prosthodontics and Other Dental Specialties

Learning Outcomes:

- Explain interdisciplinary collaboration in dental medicine.
- Explain the advantages of interdisciplinary collaboration.

S22. Aesthetics in Removable Prosthodontics

Learning Outcomes:

- Define oral and facial aesthetics.
- Describe the impact of removable and combined prosthodontic work on aesthetics.

S23. Obturators and Epitheses

Learning Outcomes:

- Describe obturators and epitheses.
- Define indications for obturators and epitheses.

S24. Patients with Special Needs

Learning Outcomes:

- Describe patients with special needs.
- Describe working with patients with special needs.

S25. Photography of Removable Prosthodontic Patients

Learning Outcomes:

- Explain the importance of photography in removable prosthodontics.

S26. New Materials in Removable Prosthodontic Therapy

Learning Outcomes:

- Describe new materials in removable prosthodontics.
- Describe working with new materials in removable prosthodontics.

S27. Duplication of Dentures

Learning Outcomes:

- Explain the duplication of dentures.
- Explain the importance of denture duplication.

S28. "Nylon" Dentures

Learning Outcomes:

- Describe "nylon" dentures.
- Describe the advantages and disadvantages of "nylon" dentures.

S29. Retentive Elements of Dentures on Implants

Learning Outcomes:

- Describe the retentive elements on implants.
- Describe working with retentive elements on implants.

The list of practicals with descriptions:

The practicals of the course Removable Prosthodontics are conducted at the Clinic for Dental Medicine of the Clinical Hospital Center Rijeka. Before participating in the practicals, students are required to acquire the theoretical knowledge that they will apply practically on models and patients. During the practicals, students will gain the knowledge and skills necessary for planning and fabricating removable and combined fixed-removable prosthodontic replacements.

Students' obligations:

Students must regularly attend and actively participate in all forms of teaching.

Assessment (exams, description of written / oral / practical exam, the scoring criteria):

ECTS credit rating system:

Student evaluation is carried out according to the valid Rulebook on studies of the University of Rijeka. The students' work will be evaluated and evaluated during the course and in the final exam. Out of a total of 100 points, a student can get 70 points during classes, and 30 points in the final exam. Students are graded using the ECTS (A-F) and numerical system (1-5). Grading in the ECTS system is carried out by absolute distribution.

Of the maximum 70 grade points that can be obtained during classes, the student must collect a minimum of 40 grade points in order to take the final exam. Students who collect less than 40 evaluation points will have the opportunity to take one remedial mid-term exam and, if they pass the mid-term exam, they will be able to take the final exam. Students who collect 39.9 or less grade points (F grade category) must re-enroll in the course.

To the final exam, the student is obliged to bring a completed control sheet from the clinical exercises.

The student acquires grade points by actively participating in classes and completing assigned tasks in the following way:

I. During the class, the following are evaluated (maximum 70 points):

Table 1: Evaluation of obligations of Dental Medicine students for the Mobile Prosthetics course

VALUATION

Max. number of evaluation points

Colloquiums

I. colloquium - at the end of the VIII semester, 20

II. colloquium – at the end of X semester 20

40 in total

Exercises Continuous verification of theoretical and practical knowledge. The average grade is taken in the following way:

grade 2=5 points

grade 3=10 points

grade 4=15 points

grade 5=20 points 20

Seminar work

Written form (PP presentation) and oral presentation (during X semester) 10

TOTAL 70

Evaluation of the colloquium with 20 evaluation points

Colloquium 40 questions = 20 points

A student must have **50%** correct answers to pass. Each further answer is multiplied by a coefficient of 0.5 and the number of points on the colloquium is obtained (20/40). If the student does not pass the colloquium on the 1st deadline, another deadline will be organized for him.

Final exam (30 marks in total)

Who can take the final exam:

Students who successfully passed I. and II. colloquium and which were positively evaluated on student exercises. Students who have obtained more than 40 points during the course must take the final exam, where they can obtain a maximum of 30 points.

Who cannot take the final exam:

Students who did not successfully pass I. and II. colloquium and which were not positively evaluated on student exercises. Students who obtained less than 40 points during the course do not have the right to sit for the final exam.

The final exam is practical, written and oral. It carries 30 evaluation points.

Evaluation of the final exam with 30 marks

5 points - practical part of the exam

5 points - written part of the exam

20 points - oral part of the exam

For a positive evaluation of the final exam, all three parts must be successfully passed. In order for a student to be evaluated with a final grade, he must successfully pass the final exam. If he does not pass the final exam, he will receive a negative grade overall. The student has the right to take the next exam period.

Formation of the final grade:

The grades achieved during the VII, VIII, IX, X and XI semesters are joined by the points achieved in the final exam. Based on the total sum of points, students are evaluated as follows:

A (5) – 90-100 grade points

B (4) – 75-89.99 grade points

C (3) – 60-74.99 grade points

D (2) – 50-59.99 grade points

F (1) – 0-49.99 grade points

The numerical evaluation system is compared with the ECTS system as follows: A - excellent (5), B - very good (4), C - good (3), D - sufficient (2), F - insufficient (1).

Other important information regarding to the course:
