

Course: Pedatric dentistry

Course Coordinator: Prof.prom.Nataša Ivančić Jokić, PhD, DDM

Course Collaborators: Prof.prom.Danko Bakarčić, PhD, DDM

Odri Cicvarić, PhD, DDM

Marija Šimunović Erpušina, DMD

Leda Bašić, DMD

Department: Department of Pediatric dentistry

Study program: University Integrated Undergraduate and Graduate Study of Dental Medicine
(in English)

Study year: 5

Academic year: 2026./27.

SYLLABUS

Course description (a brief description of the course, general instructions, where and in what form the lessons are organized, necessary equipment, instructions for attendance and preparation for classes, student obligations, etc.):

Application of theoretical knowledge: access to the child and preparing the child for dental medical procedures, treatment of dental and oral diseases in children from infant to adolescents. Practical mastery of: Method for caries prevention, diagnostic procedures, treatment of deciduous and young permanent teeth, dental treatment in persons with developmental disabilities, methods of treating the most common types of dentofacial injuries and timely recognition of malocclusion.

Assigned reading:

1. Koch G., Poulsen S., Espelid I., Haubek D. Pediatric Dentistry: A Clinical Approach . Wiley-Blackwell, 2017.
2. Cameron A., Widmer RP. Handbook of pediatric dentistry. 4th Edition. Elsevier, 2013.
3. Andreasen JO., et all. Traumatic Dental Injuries, A Manual. 2nd Edition. Blackwell Munsgaard, 2003.
4. Texts from lectures

Optional/additional reading:

1. Harris N.O., Garcia-Godoy F., Nielsen Nathe C. Primary preventive dentistry. 8th Edition. Pearson, 2014.
2. Casamassimo P. et all. Pediatric Dentistry; Infancy through Adolescence. 5th Edition. Elsevier, 2012
3. Jurić H. Dječja dentalna medicina. Jastrebarsko: Naklada Slap; 2015.
4. Bakarčić D, Ivančić Jokić N. Osnove prevencije karijesa i parodontnih bolesti. Split: Redak; 2013. Str
5. Zukanović A, Gržić R. Stomatološko liječenje medicinski kompromitiranih pacijenata. Zagreb: Hrvatska komora dentalne medicine; 2012

COURSE TEACHING PLAN:

The list of lectures (with topics and descriptions):

P1. Dental Trauma - Etiology

Expected learning outcomes

Describe the etiology of dental trauma and adopt the classifications currently used

P2. Trauma of hard dental tissues

Expected learning outcomes

Describe the diagnosis of trauma, create a treatment plan, and initiate treatment of hard dental tissue trauma.

P3. Trauma to the supporting structures of the teeth

Expected learning outcomes

Describe the diagnosis of trauma, create a treatment plan, and initiate treatment of trauma to the supporting structures of the teeth

P4. Splint, Apexogenesis and Apexification

Expected learning outcomes

Define the type of trauma and the duration for which a splint is applied and acquire knowledge about the types and techniques of splint application. Describe the mechanisms of root growth and development, possible outcomes in case of trauma, and know how to apply the appropriate therapy.

P5. Emergency Conditions in Pediatric Dentistry

Expected learning outcomes

Define emergency conditions and know how to apply timely therapy, as well as patient monitoring protocols.

P6. Use and Dosage of Antibiotics

Expected learning outcomes

Identify and recognize conditions where antibiotic prophylaxis or treatment is applied, and diagnose these conditions.

P7. Oral Surgical Procedures in Children

Expected learning outcomes

Describe the indications and techniques for oral surgical procedures in pediatric dentistry.

P8. Interceptive Orthodontics

Expected learning outcomes

Describe and recognize conditions that require the application of interceptive orthodontics, and learn the techniques for performing and monitoring indicated procedures.

P9. Pediatric Prosthetics, Space Maintainers

Expected learning outcomes

Describe when and how to create prosthetic replacements in children, and learn the indications and techniques for their application.

P10. Oral Diseases and Periodontal Diseases in Children

Expected learning outcomes

Acquire knowledge about the most common oral diseases and periodontal conditions that occur in children, and know how to apply the appropriate therapy.

P11. Working with Children with Developmental Disabilities

Expected learning outcomes

List the possibilities and methods for working with children and individuals with developmental disabilities.

P12. Working with Children with Chronic Diseases

Expected learning outcomes

Define knowledge about the possibilities and methods for working with children with chronic diseases, and become familiar with the most common conditions that require special caution when working.

P13. Oral Hygiene and Dietary Counseling in Pediatric Dentistry

Expected learning outcomes

Define the level of oral hygiene in children and the ways in which diet affects oral health and the development of caries in childhood.

P14. Fluoridation

Expected learning outcomes

List fluoride preparations used in the prevention and treatment of caries in children, and master the materials and application techniques.

P15. Fissure Sealing and Sealant Fillings

Expected learning outcomes

Define and describe the conditions of the tooth fissure system, and learn the techniques and materials used for performing fissure sealing and sealant fillings.

The lectures are available on the e-learning system Merlin.

The list of practicals with descriptions:

Practicals are conducted at the Pediatric Dentistry Department of the KBC Rijeka Dental Clinic, which is located in office number 3 at Krešimirova 40. Students actively participate in the Department's clinical work under the supervision of pedodontics specialists and dental doctors. In accordance with the decision of the Faculty of Dental Medicine, a student may be justifiably absent from no more than 20% of each form of classes (lectures, seminars, practicals). Given the level of acquired knowledge, they independently perform the treatment of pathological changes in the oral cavity in children

Students' obligations:

All forms of teaching are mandatory, and accordingly we will conduct checks of the presence of students in lectures, seminars, and practical work. Only justified absences due to illness or similar reason are accepted, in the framework of permissible regulations on the study. Student must actively participate in all forms of teaching, is obliged to prepare and present the seminar and pass a final exam.

Assessment (exams, description of written / oral / practical exam, the scoring criteria):

Students evaluation and assessment is provided during classes (clinical exercises) and at the final exam.

According to the regulations on studies at the University of Rijeka, a student must achieve at least 50% of the grade during classes in order to be able to take the final exam. Other 50% student achieve during the final exam. The final grade represents the sum of grade points achieved during classes and at the final exam.

Exercises are held during the 8th, 9th, 10th and 11th semesters.

During the exercises, the student must independently perform the following activities that are rated 0 - 1- 2 points:

- 2 systematic examination of children (extraoral examination, intraoral examination, dental status)
- 2 treatment plan
- 2 Analysis of X-ray images in children (intraoral shots, orthopantomograph shots)
- 2 preventive measures for cleaning soft sediments
- 2 Restoration of teeth in a child (from 3 - 18 years of age)

A student in the exercises can get a maximum of 20 points.

There will be a continuous verification of knowledge through written colloquium that will be held at the end of the 8th, 9th and 10th semesters.

Each written colloquium consists of 20 questions, and points begin to be collected when 50% of the test is solved. Each correct answer (over 50% of the test answers) carries 1 (one) point.

A maximum of 10 points can be collected per colloquium (3 colloquium - max 30 points).

Final 50% of the grade the student acquires the final exam.

The final exam is consists of practical, written and oral part.

The practical part brings maximal 10 points, written part 10 points and oral part 30 points.

Practical implementation of the evaluation of the clinical dental examination by a medical form that consists of 25 items which are rated from 0 - 1 - 2 points.

Score threshold is:

37-40 7 points

41-44 8 points

45-47 9 points

48-50 10 points

The written part consists of 10 questions, and the points start to be collected after solving 50% of the test. Each correct answer (above 50% of the test solution) carries 2 (two) points

The oral part of the exam - student must respond positively to questions covering all sections of dental medicine in childhood.

In order to be able to be judged the final grade, the student must successfully pass the final exam. If student does not pass the final examination, he/she will receive a total negative score. The student has the right to access the next test period.

Final grade:

- the points achieved in the colloquiums and exercises are added to the points from the exam

- final grade:

0-49.9 % insufficient 1 F

50-59.9% enough 2 D

60-74.9% good 3 C

75-89.9% very good 4 B

90-100% excellent 5 A.

Other important information regarding to the course:

The introductory lecture will be held according to the scheduled schedule, while the other lectures will be posted on the e-learning system MERLIN as part of the e-college.

Any use of another's text or other form of author's work, as well as the use of ChatGPT or any of another tool whose functionality is based on artificial intelligence technology, without clear and unambiguous citation of sources, is considered a violation of someone else's copyright and the principle of academic integrity and represents

serious violation of student obligations, which entails disciplinary responsibility and disciplinary measures accordingly Rulebook on disciplinary responsibility of students.

Consultation time: Thursday 14.00-15.00

COURSE SCHEDULE (for the academic year 2026/2027)

Date	Lectures (time and place)	Seminars (time and place)	Practicals (time and place)	Instructor
