

Course: Removable prosthodontics

Course Coordinator: Daniela Kovačević Pavičić, DMD, PhD, Full Professor

Department: Department of Prosthodontics

Study program: University Integrated Undergraduate and Graduate Study of Dental Medicine
(in English)

Study year: 5.

Academic year: 2026./27.

SYLLABUS

Course description (a brief description of the course, general instructions, where and in what form the lessons are organized, necessary equipment, instructions for attendance and preparation for classes, student obligations, etc.):

Course: Removable Prosthodontics

The course Removable Prosthodontics 2 is a compulsory course in the fifth year of the Integrated Undergraduate and Graduate University Study Programme in Dental Medicine. It consists of 30 hours of seminars and 60 hours of practical exercises (6 ECTS credits). The course is conducted at the premises of the Clinic of Dental Medicine of the Clinical Hospital Centre Rijeka and the Faculty of Dental Medicine.

The aim of the course is to enable students to diagnose and treat complete and partial edentulism and all its consequences by fabricating complete or partial removable denture under clinical conditions. Students also acquire knowledge of complex treatments involving combined fixed and removable denture, as well as functional and aesthetic rehabilitation of the stomatognathic system through collaboration with specialists from other dental disciplines. The teaching objectives are to provide students with knowledge of the anatomical and functional relationships, neuromuscular mechanisms, and biomechanics of the stomatognathic system and their disorders associated with partial or complete edentulism, as well as their diagnosis and treatment, including craniomandibular disorders and the fundamentals of implant-supported removable prosthodontics.

The course content includes theoretical foundations and practical knowledge of the technical, technological, and clinical procedures involved in all stages of fabricating partial and complete dentures. Students are introduced to the etiology, pathology, pathophysiology, and diagnosis of disorders and degenerative changes in the stomatognathic system resulting from partial or complete tooth loss. Clinical and instrumental analysis and adjustment of occlusion, pre-treatment procedures, and pre-prosthetic patient preparation are covered, including splints, dental implants, and procedures for fabricating combined fixed and removable dental prostheses. The course also covers the fabrication of temporary, immediate, and overdentures, as well as denture fracture repair and relining. The fundamentals of oral rehabilitation and interdisciplinary collaboration in the diagnosis and treatment of partial and complete edentulism and its consequences are also addressed.

Teaching is conducted through seminars and practical exercises over a total period of two semesters. During practical exercises, the teacher demonstrates the procedures and supervises the students' active participation. During seminars, instructors discuss the specific aspects of prosthetic rehabilitation with students.

One seminar paper will be assessed, and students' theoretical and practical knowledge will be continuously evaluated during clinical exercises. At the end of the course, a final written examination will be held. By completing all teaching activities and taking the final examination, the student earns 6 ECTS credits.

Assigned reading:

Filed J, Storey C. Removable Prosthodontics at a glance. Wiley-Blackwell. 2020.

Optional/additional reading:

Carr AB, McGivney GP, Brown DT. McCracken's Removable Partial Prosthodontics 11th ed., Elsevier Mosby, 2006.

The list of seminars with descriptions:

S1. Overdentures

Learning Outcomes:

- Define overdentures.
- Explain the advantages and disadvantages of overdentures.

S2. Implants overdentures

Learning Outcomes:

- Explain the advantages and disadvantages of implants overdentures.
- Describe the fabrication process.

S3. Immediate Denture

Learning Outcomes:

- Define an immediate denture.
- List the advantages and disadvantages of an immediate denture.
- Describe the fabrication process.

S4. Temporary Denture

Learning Outcomes:

- Define a temporary denture.
- Explain the conversion of a temporary denture into a definitive one.

S5. Combined fixed-mobile replacement

Learning Outcomes:

- Define combined prosthodontic work.
- Describe the fabrication process of combined prosthodontic work.
- Explain the advantages of combined prosthodontic work compared to conventional dentures.

S6. Cementation of Combined fixed-mobile replacement

Learning Outcomes:

- Describe the cementation process of combined prosthodontic work.
- Describe potential complications during cementation.

S7. Materials in Removable Prosthodontics

Learning Outcomes:

- Describe materials used in removable prosthodontics.
- Describe the handling and storage of impression materials.

S8. Complications During Removable Prosthodontic Rehabilitation

Learning Outcomes:

- Describe complications that may arise during removable prosthodontic rehabilitation.
- Explain possible solutions for resolving removable prosthodontic complications.

S9. Dissatisfied Patient

Learning Outcomes:

- Describe communication strategies with a dissatisfied patient.

S10. Abrasion and Prosthodontic Rehabilitation

Learning Outcomes:

- Define the causes and consequences of abrasion.
- Describe prosthodontic rehabilitation options for patients with abrasion.

S11. Temporomandibular Dysfunction and Removable Prosthodontic Patients

Learning Outcomes:

- Define temporomandibular dysfunctions.
- Describe prosthodontic rehabilitation for patients with temporomandibular dysfunction.

S12. Basics of Implantology and Osseointegration in Removable Prosthodontics

Learning Outcomes:

- Define osseointegration.
- Describe removable prosthodontic work on implants.

S13. Pediatric Prosthodontics

Learning Outcomes:

- Define indications for prosthodontic therapy in children.
- Describe the fabrication of prosthodontic work in children.

S14. Geriatric Prosthodontics

Learning Outcomes:

- Describe the specific aspects of working in removable prosthodontics for elderly patients.
- Define potential complications in elderly patients.

S15. Speech and Removable Prosthodontic Replacements

Learning Outcomes:

- Describe the impact of speech on communication.
- Explain the impact of prosthodontic replacements on communication.
- Define errors in prosthodontic replacements that affect speech.

S16. BPS Dentures

Learning Outcomes:

- Explain BPS dentures.
- Describe the advantages and disadvantages compared to conventional dentures.
- Explain the fabrication process.

S17. Hybrid Dentures

Learning Outcomes:

- Explain hybrid dentures.
- Describe the advantages and disadvantages compared to conventional dentures.
- Explain the fabrication process.

S18. High-Risk Prosthodontic Patients

Learning Outcomes:

- Define high-risk patients.
- Explain the "preparation" of high-risk patients for prosthodontic rehabilitation.

S19. Preprosthetic Patient Preparation

Learning Outcomes:

- Explain preprosthetic patient preparation.
- Explain the advantages of preprosthetic patient preparation.

S20. Consequences of Wearing Inappropriate Removable Prosthodontic Replacements

Learning Outcomes:

- Describe the consequences of wearing inappropriate prosthodontic replacements.
- Explain the resolution of issues caused by wearing inappropriate prosthodontic replacements.

S21. Collaboration Between Prosthodontics and Other Dental Specialties

Learning Outcomes:

- Explain interdisciplinary collaboration in dental medicine.
- Explain the advantages of interdisciplinary collaboration.

S22. Aesthetics in Removable Prosthodontics

Learning Outcomes:

- Define oral and facial aesthetics.
- Describe the impact of removable and combined prosthodontic work on aesthetics.

S23. Obturators and Epitheses

Learning Outcomes:

- Describe obturators and epitheses.
- Define indications for obturators and epitheses.

S24. Patients with Special Needs

Learning Outcomes:

- Describe patients with special needs.
- Describe working with patients with special needs.

S25. Photography of Removable Prosthodontic Patients

Learning Outcomes:

- Explain the importance of photography in removable prosthodontics.

S26. New Materials in Removable Prosthodontic Therapy

Learning Outcomes:

- Describe new materials in removable prosthodontics.
- Describe working with new materials in removable prosthodontics.

S27. Duplication of Dentures

Learning Outcomes:

- Explain the duplication of dentures.
- Explain the importance of denture duplication.

S28. "Nylon" Dentures

Learning Outcomes:

- Describe "nylon" dentures.
- Describe the advantages and disadvantages of "nylon" dentures.

S29. Retentive Elements of Dentures on Implants

Learning Outcomes:

- Describe the retentive elements on implants.
- Describe working with retentive elements on implants.

The list of practicals with descriptions:

The practicals of the course Removable Prosthodontics are conducted at the Clinic for Dental Medicine of the Clinical Hospital Center Rijeka. Before participating in the practicals, students are required to acquire the theoretical knowledge that they will apply practically on patients. During the practicals, students will gain the knowledge and skills necessary for planning and fabricating removable and combined fixed-removable prosthodontic replacements.

Students' obligations:

Students must regularly attend and actively participate in all forms of teaching.

Assessment (exams, description of written / oral / practical exam, the scoring criteria):

ECTS Grading System

Student assessment is conducted in accordance with the applicable Regulations on Studies of the University of Rijeka.

Students' work is assessed and graded throughout the course and during the final examination. Out of a total of 100 points, students can earn 50 points during the course and 50 points on the final

examination.

Student assessment is conducted using both the ECTS grading system (A–F) and the numerical grading system (1–5). ECTS grading is based on absolute distribution.

ASSESSMENT OF STUDENT COURSE REQUIREMENTS DURING THE COURSE

MAXIMUM NUMBER OF POINTS: 50

Seminar – 10 points

Continuous assessment of knowledge during practical exercises – 40 points

FINAL EXAMINATION

Written examination – 50 points

The pass threshold is 50% of the questions answered correctly.

Who is eligible to take the final examination?

Of the maximum 50 assessment points that can be earned during the course, the student must obtain a minimum of 25 assessment points in order to be eligible to take the final examination.

Students are required to bring their completed clinical exercise logbook/checklist to the final examination.

Students earn assessment points through active participation in classes and completion of assigned tasks as follows:

ASSESSMENT – MAXIMUM NUMBER OF ASSESSMENT POINTS

SEMINAR

Written PPT presentation and oral presentation – 10 points

PRACTICAL EXERCISES

Continuous assessment of practical and theoretical knowledge. The average grade is converted into points as follows:

Grade 2 – 20 points

Grade 3 – 30 points

Grade 4 – 40 points

Grade 5 – 50 points

TOTAL: 50 points

Final Examination

The final examination is a written examination and is worth 50 assessment points.

In order to receive a final grade, the student must successfully pass the final examination. If the student does not pass the final examination, a failing grade will be awarded. The student is entitled to take the

examination at the next available examination session.

Formation of the final grade:

The grades achieved during the VII, VIII, IX, X and XI semesters are joined by the points achieved in the final exam. Based on the total sum of points, students are evaluated as follows:

A (5) – 90-100 grade points

B (4) – 75-89.99 grade points

C (3) – 60-74.99 grade points

D (2) – 50-59.99 grade points

F (1) – 0-49.99 grade points

The numerical evaluation system is compared with the ECTS system as follows: A - excellent (5), B - very good (4), C - good (3), D - sufficient (2), F - insufficient (1).

Other important information regarding to the course:
